

Industrial Current Transformer Series 3300 — Datasheet

Document: DS-ELEC-3300 | Rev: Rev C | Date: 2024-09-10 | Author: ElectroMeasure AG — Applications Engineering

1. Electrical Specifications

Parameter	Value	Unit	Notes
Nominal current range	0 to 20	A rms	
Accuracy class	Class 0.5	—	IEC 61869-2
Continuous overload rating	14	A	See note 2
Short-time overload	20	A	< 1 second
Output signal	4–20	mA	
Operating temperature	-25 to +70	°C	

Note 2 — Continuous Overload Rating: The sensor is rated for continuous operation up to **14 A**. Operation between 14 A and 20 A is permissible for short durations (< 60 seconds). Sustained operation above 14 A will cause progressive accuracy drift. ElectroMeasure recommends that process alarm thresholds triggering corrective action be set no higher than the continuous overload rating.
